

The TITAN Wireless Audio Gateway WAG

THE TITAN WAG

The Titan Wireless Audio Gateway for mobile radios makes wireless communication easy in all environments. The state-of-the-art WAG has two AIRCRYPT modules built in. One module for wireless headset pairing and one module for wireless PTT pairing.

The TITAN WAG has a side PTT button, volume control and 2 LED for easy pairing.

The TITAN WAG can be paired with all Titan wireless headsets and most consumer headsets.

Part number:
WAG

Technical data

Dimensions	94 x 61 x 26mm	Environmental specifications	
Weight	90 g	Operating temperature	-20° C to +45° C
		Storage temperature	-40° C to +65° C
Wireless Module	Aircrypt Dual Module	Mechanical specifications	
Module Frequency	2,4 GHz	Cable flex life	50,000 cycles
		Cable pull strength	Axial 13 kgs
Protection rating	IP54	PTT switch life	100,000 cycles
